

BIGBOX

SELF TIPPING BULK HAULER

It's called BigBox for a reason! Maximum volume is the key to efficient hauling and TYCROP has gone after every available inch. Over 5100 cubic feet gives plenty of room and the 1" thick reinforced aluminum walls provide more than enough strength for any type of bulk material.

Unload can be done anywhere and anytime with on-board hydraulic rams or on a tipper.

Weight	30,430 lbs. (13,803 kg)
Volume	5,120 cu. ft.
Payload	88,185 lbs. (40 tonnes)

VOLUME

It's called a BIGBOX for a reason!
Maximum volume is the key to efficient hauling and TYCROP has gone after every available inch. Over 5100 cubic feet gives plenty of room for hauling any bulk material.

AGILITY

Having the control and diversity to self-unload bulk materials wherever and whenever means more hauling options and opportunities.

TOUGH

Interlocking wall panels (developed for our SMOOTHFLOW trailers) are 1" thick, reinforced aluminum. They provide more than enough strength for some of the roughest materials you can dump in it.

DEPENDABLE

Easy and accessible maintenance for long product life. We design and build the trailers so we can support you when you need to service or repair your BIGBOX.

The BIGBOX End-Dump B-Train trailer is our most versatile and efficient bulk transport solution.

With on-board heavy duty hydraulic rams, the BIGBOX can unload anywhere your load needs to go - plus it can be unloaded on conventional tipping platforms.
